PROFESSIONAL SUMMARY

Backend .NET Engineer with 4 years of experience building and maintaining production-grade, multi-tenant HR SaaS applications. Specialized in .NET 8, ASP.NET Core, ABP Framework, Clean Architecture, and RESTful API development. Experienced in asynchronous processing with RabbitMQ, database performance optimization, and implementing complex payroll and attendance workflows using SQL Server and PostgreSQL. Focused on building maintainable backend systems and delivering reliable business-critical features.

PROFESSIONAL EXPERIENCE

Backend .NET Developer | ASIS Solutions, Cairo, Egypt (Sep 2024 – Present)

- Developed core modules of a production multi-tenant HR SaaS platform serving enterprise clients, using .NET 8 and ABP Framework.
- Architected and delivered RESTful APIs across 7+ HR domain modules following Clean Architecture, enabling independent module deployment.
- Implemented RabbitMQ-based async workflows for payroll and attendance processing, decoupling background jobs from the request lifecycle.
- Contributed to a high-throughput payroll and attendance processing engine, handling device transactions and complex HR business rules, with aggregated results persisted for downstream reporting.
- Mentored junior developers through code reviews, technical guidance, and pair programming, accelerating their onboarding to production workflows.

Full Stack .NET Developer | ASIS Solutions, Cairo, Egypt (May 2023 – Sep 2024)

- Developed and maintained HR management features using ASP.NET Core, Web API, Angular, Entity Framework Core, and SQL Server.
- Led the migration of 4 legacy HR modules toward Clean Architecture, reducing average bug-fix time from 3 days to less than 1 day through improved code organization and API restructuring.
- Optimized SQL queries, indexes, stored procedures, and database functions to improve performance across complex HR workflows.
- Integrated Azure Active Directory SSO to support enterprise authentication and access control.
- Reduced report generation time by 40% by introducing asynchronous processing and eliminating synchronous blocking operations; also developed operational reports using DevExpress.

INTERNSHIP EXPERIENCE

Full Stack .NET Developer Intern | Information Technology Institute (ITI), Asyut, Egypt (Nov 2022 – Mar 2023)

- Completed an intensive 4-month program at ITI building full-stack applications with ASP.NET Core, Angular, REST APIs, and JWT authentication.

TECHNICAL SKILLS

- Backend & Frameworks: C#, .NET (3.1, 6, 8), ASP.NET Core Web API, RESTful APIs, Entity Framework Core, ABP Framework, LINQ, Middleware, OpenAPI/Swagger
- Architecture & Design: Clean Architecture, SOLID Principles, Design Patterns, Dependency Injection, Repository Pattern, Unit of Work, Multi-Tenant SaaS Architecture
- Databases & Caching: SQL Server, PostgreSQL, Redis, Stored Procedures, Database Functions, Query Optimization, Indexing
- Messaging & Background Processing: RabbitMQ, Hangfire, Background Jobs, Scheduled Jobs, Background Services
- Authentication & Security: JWT, Azure Active Directory (SSO), Authentication & Authorization
- Logging & Monitoring: Serilog, Structured Logging, Exception Handling Middleware
- Validation: FluentValidation, Data Annotations
- Testing: xUnit, Unit Testing
- DevOps & Tools: Azure (Basic), Azure DevOps, Git, Postman, Agile Methodology
- Frontend (Secondary): Angular, TypeScript

EDUCATION

Cairo University, Egypt

B.Sc. in Computers and Information (Information Technology) | 2016 – 2020

Military Service

Egyptian Armed Forces | Apr 2021 – Jun 2022 Mandatory national service, completed in full.
