PROFESSIONAL SUMMARY

Backend .NET Developer with 3.5+ years of experience delivering business-critical features for a multi-tenant HR SaaS platform. Built scalable APIs, payroll and attendance workflows, using .NET 8, ABP Framework, Clean Architecture, and RabbitMQ. Experienced with SQL Server, PostgreSQL, Redis, and performance optimization.

PROFESSIONAL EXPERIENCE

Backend .NET Developer | ASIS Solutions, Cairo, Egypt (Jul 2024 – Present)

- Developed core modules of a production multi-tenant HR SaaS platform serving enterprise clients, using .NET 8 and ABP Framework.
- Architected and delivered RESTful APIs across 7+ HR domain modules following Clean Architecture, enabling independent module deployment.
- Implemented RabbitMQ-based async workflows for payroll and attendance processing, decoupling background jobs from the request lifecycle.
- Introduced xUnit test suite for core payroll and leave modules, achieving 40% coverage and catching regressions before production releases.

Full Stack .NET Developer | ASIS Solutions, Cairo, Egypt (May 2023 – Jul 2024)

- Built and maintained a full-stack HR management system using ASP.NET Core, Angular, and SQL Server.
 - Led migration of 4 legacy HR modules to Clean Architecture, reducing average bug fix time from 3 days to under 1 day by refactoring API structure, improving code organization, and introducing new submodules.
 - Developed and optimized RESTful APIs using EF Core and SQL Server, including stored procedures and database functions for complex HR workflows.
 - Improved system performance through query optimization, indexing strategies, and redesigning inefficient legacy database operations.
 - Integrated Azure AD SSO authentication for enterprise-level access control.
 - Implemented reporting modules using DevExpress to deliver structured HR analytics and operational reports.
 - Reduced report generation time by 40% by introducing async processing, replacing synchronous blocking calls.
-

INTERNSHIP EXPERIENCE

Full Stack .NET Development Intern | Information Technology Institute (ITI), Asyut, Egypt (Nov 2022 – Mar 2023)

- Completed an intensive 4-month training program focused on ASP.NET Core, Angular, REST APIs, and JWT Authentication.
- Built full-stack web applications following layered architecture and modern software development practices.
- Developed secure backend APIs and integrated Angular frontends using JWT-based authentication and authorization.

TECHNICAL SKILLS

- Backend & Frameworks: C#, .NET (3.1, 6, 8), ASP.NET Core Web API, RESTful APIs, OpenAPI/Swagger, Entity Framework Core, ABP Framework, LINQ, Dependency Injection, Middleware
 - Architecture & Design: Clean Architecture, Repository Pattern, Unit of Work, SOLID Principles, Multi-Tenant SaaS Architecture
 - Databases & Caching: SQL Server, PostgreSQL, Redis
 - Messaging & Background Processing: RabbitMQ, Background Services
 - Authentication & Security: JWT, IdentityServer, Azure Active Directory (SSO)
 - Validation: Fluent Validation, Data Annotations
 - DevOps & Tools: Azure (Basic), Azure DevOps, Git, Agile Methodology
 - Frontend (secondary): Angular, TypeScript
 - Testing: xUnit, Unit Testing
-

EDUCATION

Cairo University, Egypt

B.Sc. in Computers and Information (Information Technology) | 2016 – 2020

Military Service

Egyptian Armed Forces | Apr 2021 – Jun 2022 Mandatory national service, completed in full.
